

Hinode Observing Schedule – August, 2007

| | <u>Requested</u> | <u>Assigned</u> | <u>Hinode contact</u> |
|------------------------|------------------|----------------------|-----------------------|
| HOP 26 (Bloomfield) | 8/9 - 8/20 | 8/9 – 8/17 (9 days) | Tsuneta |
| HOP 20 (Ryback) | 8/18 – 8/31 | 8/18 – 8/23 (6 days) | Culhane |
| HOP 21 (Roudier) | 8/25 – 8/31 | 8/29 – 8/31 (3 days) | Berger |
| HOP 34 (Marsh) | 8/21 – 8/30 | 8/25 – 8/28 (4 days) | Culhane |

- i) HOP 21 requested 24-48 hours of continuous observations. It was agreed that we assign HOP 21 three days of observations.
- ii) It was strongly recommended that the ground based observers for each HOP be encouraged to contact the Hinode Chief Observers as soon as they had achieved a successful observation so that any remaining priority time could be redistributed.
- iii) It was also recommended that the Chief Observers be granted a degree of flexibility in implementing the program to take into account solar conditions.
